Experience

Infinity Datasoft PHP Web Developer	Mohali 16/10/2022 to 1/3/2023
- Architected and developed production-ready web applications using Laravel, Vue.js, and Inertia.js to ensure high performance and scalability. - Collaborated with international clients to translate complex business requirements into actionable development plans and technical specifications. - Engineered cross-platform mobile solutions using React Native and TypeScript, maintaining a consistent user experience across iOS and Android. - Implemented automated workflows using n8n, streamlining business processes and integrating third-party services like Telegram and CMS platforms. - Optimized full-stack codebases (PHP, JavaScript, SQL) to reduce server response times and improve overall frontend rendering speed. - Managed seamless website migrations and deployments, minimizing downtime and ensuring data integrity across various hosting environments. - Developed custom WordPress plugins and themes, providing technical troubleshooting and advanced feature integration for specialized client needs. - Ensured SEO best practices were integrated into the core architecture of web applications to enhance search visibility and organic traffic.	

- **Architected and maintained complex web applications** using **Laravel** and **CodeIgniter**, ensuring robust backend logic and high-performance database management.
- **Developed custom WordPress solutions**, including bespoke plugin development and theme optimization to meet specific client requirements and SEO standards.
- **Engineered dynamic frontend interfaces** using **JavaScript (ES6+)** and modern frameworks, significantly improving user engagement and interface responsiveness.
- **Collaborated directly with international clients** to gather technical requirements, providing expert consultation on full-stack architecture and project timelines.
- **Streamlined development workflows** by integrating **n8n automation**, reducing manual data entry and improving API synchronization across platforms.
- **Optimized legacy PHP codebases**, implementing modern design patterns to enhance security, scalability, and server-side execution speed.
- **Managed the full software development life cycle (SDLC)**, from initial database schema design in SQL to final deployment and server maintenance.
